

Euthanasia declaration and interdiction of medical treatment

I am in possession of an interdiction of treatment in accordance with Netherlands law. When I find myself in a condition from which a return to a tolerable and dignified life (**among which I understand in any case a coma of more than ____ weeks or a permanent vegetative condition**) is no longer possible, I demand to be taken as soon as possible to The Netherlands. If that should not be possible I then request you to stop all treatment with the exception of treatment aimed at relieving pain, breathing problems and other discomfort (palliative treatment). I therefore do not wish to be administered nutrition or fluids.

Likewise I am in possession of an euthanasia declaration in accordance with Netherlands law. If the rules of your country oppose the stopping of treatment or the practice of euthanasia I call upon you to take into account my request as far as possible and to refrain from prolonging my life by way of medical intervention.
